EXPERIENCE

RBC CAPITAL MARKETS | Financial Analyst

Sept 2020 – Dec 2020 | Toronto, ON

- Consolidated data from P&L and Liquidity Flag reports into daily fiscal reports using MS Access
- Maintained database for global treasury services and fixed the pre-existing database issues with VBA skills
- Generated weekly and month-to-date reports using Tableau
- Gained practical knowledge about funding structure through the inquiries from Stakeholders
- Successfully tackled all the requests that required immediate attention from the front office while meeting the daily deadline

DELOITTE LLP | Financial Crime Analytics

Jan 2020 – Apr 2020 | Toronto, ON

- Created stored procedures and functions in SQL Server database
- Extracted and loaded data using SQL Server DTS and SSIS
- Designed visually appealing Tableau dashboards to analyze online banking transactions and identify fraud activities
- Assisted the e-discovery team to analyze suspicious financial activities that potentially leaked the client's confidential information
- Supported multiple project teams proactively to execute against an existing project or work plan

SERVA SOFTWARE CO., LTD | Software Engineer Intern

May 2018 – Aug 2018 | Shanghai, CN

- Implemented the data dictionary function in the CRM system, improving data reading efficiency by 35%
- Developed functions to show market activities and customer transactions using AJAX in JSP
- Enhanced the level of user accounts' security using MD5 encryption

PROJECTS

OPERATIONS MANAGEMENT | Excel/VBA

- Calculated sales revenue and wage/commission schedule using VLOOKUP, INDEX, MATCH, etc.
- Implemented easy-to-use operation functions to keep track of input purchase and sales
- Organized all operating data into Income Statement and achieved automation through VBA programming

CUSTOMER ANALYTICS | Python

- Built a predictive model using a random forest algorithm with scikit-learn package
- Conducted exploratory data analysis to segment customer base using Pandas
- Visualized the engagement rate through a bar chart based on Customer Lifetime Value and Months Since Policy Inception

HIGHLIGHTS

- Working experience in data analysis and reporting on large data-sets
- Hands-on experience working with data visualization and dashboarding
- Strong programming and statistics background within finance industry
